

# SHADOW®

## SHADOW® BLACK NITRILE EXAM GLOVES

Shadow Black Nitrile Powder Free Exam Glove is one of the most popular gloves among tattoo, piercing and body art artists. It is also a favorite of mechanics, industrial and manufacturing crews. Shadow gloves are thicker than most nitrile gloves and can stand up to more rugged and harsh jobs in repairs, maintenance and manufacturing.

They are also the preferred choice among law enforcement agencies, correctional facilities, and fire departments. Their distinct dark black color projects a tough image.

They provide superior puncture, tear and chemical resistance, yet with excellent dexterity. The textured surface provides a strong grip.
